

MERMAID QUAY – CARDIFF BAY

Case Study: A New Improved You!

Patient A: Age 47

“I had never been that happy with my teeth, so when I saw an advert for Oasis Dental in Mermaid Quay, I thought I would go along and have a Free Consultation to see what they could do for me.

“I was really impressed, I found their manner and approach very appealing – there was no hard sell.

“The first thing I decided to have done was the alignment of my bottom teeth with my top teeth through filing down. I hadn’t realised but my bite was not meeting properly – there were some gaps and my teeth were crashing together and wearing down in places.

“It’s amazing what a difference such a minor treatment can make. No other dentist had ever suggested doing it, but it made me look much better.

“I still had crooked bottom teeth though, and some of my top teeth were damaged and cracked through various sporting injuries.

“I had nine of my teeth filled with ceramic inlays, with old amalgam fillings being removed. Then 18 of my teeth were crowned to give my smile a whiter and less crooked appearance.

“Fantastic pain relief meant I never worried about going for my appointments at Oasis Dental Care Mermaid Quay, I just looked forward to the end result!

“Although my teeth weren’t great before, I thought they were adequate – I guess I just didn’t know what I was missing out on. Everybody has said I look much better now”
